

Safer Survival Tools for Little **Warriors**.

ArcAngel

Uncuffed ET, Gastric Suction & Feeding Tube Holder

Invented by a Nurse Practitioner, ArcAngel is a secure, adjustable, multi-functional neonatal and pediatric endotracheal tube holder that eliminates tape and increases ETT/NGT placement accuracy. Silicone cheek pads are gentle, easy to clean and replaceable.

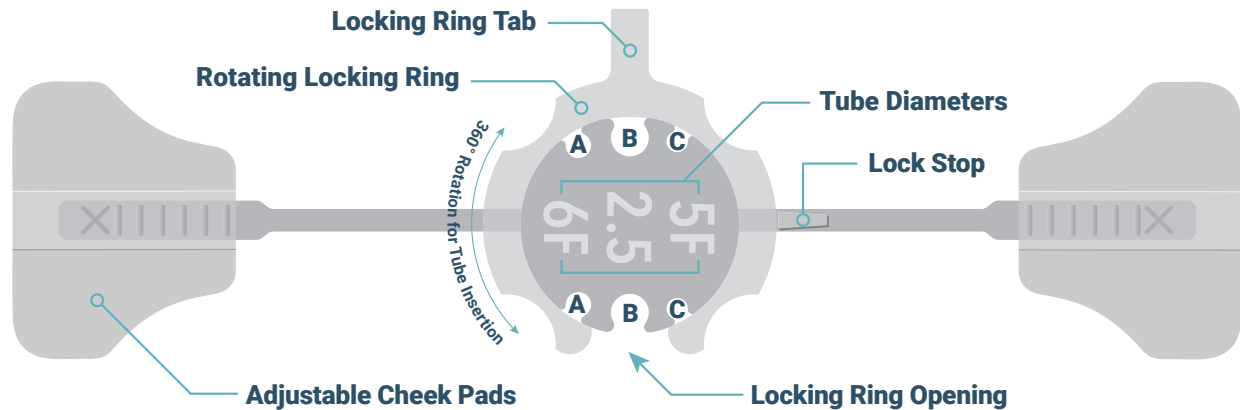

One Clinician, One Hand – Seconds for Adjustments

Key Features & Benefits.

- ✓ Securely holds both endotracheal and gastric suction/feeding tube
- ✓ Adjust ET and NG or gastric suction tubes independently of each other
- ✓ ETT/NG/gastric suction tubes can be inserted and secured both orally and nasally
- ✓ 0.25cm hash marks on the holder make adjustments safe and precise
- ✓ MRI safe – metal free
- ✓ Non allergenic – latex free
- ✓ Eliminates tape on baby's face for better visibility
- ✓ Decreased risk of skin damage due to tape irritation and repeated cleaning/reapplication
- ✓ Cheek pads can be wiped clean and are available in 2 sizes for a custom fit
- ✓ Cheek pads are designed to eliminate the need to trim
- ✓ The arc is easily removed in emergency situations without need to remove cheek pads

ArcAngel Twist Lock Technology.

Tube Holders: A. Gastric Suction* B. Endotracheal* C. Feeding*
